PULSE OXIMETERS

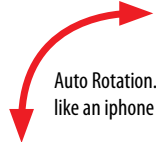

Biolight M800 Handheld Pulse Oximeter

- Auto rotation Hi-Res 2.4" colour OLED display: 320x240 pixels
- SPO2 and PR monitoring (ECG optional)
- Suitable for Adult, Pediatric & Neonatal patients
- Spot check and continuous monitoring modes
- Customisable alarm settings
- Max 60,000 group short trend data store & review
- AA batteries for 16 hours of continuous use.

Consumables & Accessories

1. 3 Lead ECG Module & Cable (BioE3)
2. Charge Cradle (BIORB)
3. Carry Bag (BIO150330003)

Ishihara Colour blindness book

Ishihara Pseudo-Isochromatic Tests are the most widely used standard of color vision screening in a book form. Ishihara's color perception test charts are recognized internationally as a highly reliable method of determining color deficiency. With normal color perception, the images and numbers will all be visible. Test your eyes and vision for colour blindness.

BLOOD ANALYSIS

Cardiochek PA Analyser

The CardioChek PA is a portable analyser capable of a variety of cholesterol related tests using minimal amount of patient blood. It is a hand held, and accurate spectrophotometer used for both personal and professional use. Fast turn-around time, reliable results. In just two minutes you have the specific patient data you need in-hand.

- Accurate results on the spot in just 2 minutes
- Easy to use. Two buttons do it all!
- Portable, palm-sized, easy to ship and store
- Factory-calibrated and ready to use
- Most cost effective lipid profile test available
- Battery operated meaning it is truly portable
- Fast test time - just 2 minutes for a full lipid profile
- Room temperature strip storage until expiry (up to two years)
- Comprehensive range of test panels available
- PTS Panels Test Strips contain a color coded MEMO Chip
- Offers direct LDL testing

SPIROMETRY

MIR Spirodoc 3D Oximeter & Spirometer

4 devices in 1 single pocket size unit: Spirometer + Pulse Oximeter + Accelerometer + Patient Diary.
Extremely detailed and accurate - Stand alone and PC connection for real time tests

FEATURES

- Back-light touchscreen display (with intuitive icons for patient name and data insertion)
- No Calibration required due to factory calibrated turbines (ATS/ERS standards)
- Export PDF for import to patient record software
- Range of Spirometry test - FVC, VC, IVC, MVV, PRE-POST
- Precise spirometry interpretation even post bronchodilator.
- All results shown on the display during and after the test
- Stand alone testing on device or real time on PC.
- Automatic BTPS conversion with inbuilt temperature sensor
- Advanced Pulse-Oximetry analysis:
(6 Minute Walk Test / Sleep test / Spot test / 24h Holter test)
- Triaxial accelerometer to detect patient movements (for Rehab, daily activities, 6MWT and Sleep test) according to the latest international recommendations.
- Huge memory for long term test recording. 10,000 Spirometry tests or 1,000 hours of Pulse Oximetry
- Rechargeable (high capacity lithium batteries)
- Telemedicine ready

Option:

1. Reusable turbine (MIR910002)
2. Forehead Probe

Forhead Probe (TAINELFOR)
Detects changes in SpO2 notably earlier than digit sensors during poor perfusion conditions.

SPIROMETRY

MIR Spirolab III

Spirolab III is a multitasking and versatile spirometer ideal for accurate and early diagnosis of respiratory diseases (like COPD and Asthma). Spirolab III is easy to use for family doctors screening, pharmacy quick tests, teleconsulting and paediatric patients.

- 3rd generation diagnostic spirometer with oximetry (optional) and high-res colour display
- Up to 8 tests on screen at one time, 6000 Spirometry test or 1000 hours oximetry memory
- USB and Rs232 connections, fast & quiet 112mm in-built thermal printer
- Oximetry Option - Different types of oximetry tests including sleep and exercise tests
- Internal rechargeable battery and/or mains operation, automatic BTPS correction
- Full alpha-numeric keyboard for fast and easy data entry
- Carry case, PC connection, 10 disposable turbines
- WinSpiro Pro Software included as standard
- Never requires calibration,
- Weight 1.9kg / Size: 310x205x65mm
- Comes with 10 Disposable Turbines

Option:

1. B&W display with 10 disp turbines (MIR910655D10) - \$2,495+GST
2. With SpO2 Option, colour display (MIR910651D10) - \$3,495+GST

M Series Ultrasonic Cleaners

Using ultrasonic energy and a process known as cavitation, ultrasonic cleaning is the most effective way of deep cleaning difficult to reach and complex shaped items. These stainless steel Ultrasonic Cleaners combine industry knowledge with state of the art technology to offer the new M series range, a reliable and affordable option for medical grade ultrasonic cleaning solution.

- Time set: 0~30 mins mechanical timer
- Material: High quality stainless steel
- Feature: Purge tank moulded by punch, without any gap
- Drainage system: Models with 6L above are installed drainage ball valve
- Great chamber length for long instruments
- Stainless steel basket & lid included

Q Series Examination Lights

The Q series Examination Lamps are intended for the use in minor surgery rooms, outpatient examinations and doctor's office. Minor lamp head with diameter of 75mm enables close use without blocking out the vision of users. The 700mm-long flexible arm can freely position in order to fully satisfy any requirements for diverse illuminated angles. The holder is easy to move for a flexible occupancy. The glass color filter creates white and soft light as natural light. This product is fit for body-examination or minor operation of Ophthalmology and otorhinolaryngology department, gynecology and obstetrics department and outpatient department. It is able to work as subordinate illumination in operation room, as well as office light.

Rimsa PrimaLed 9 x LED Minor Surgery/Examination Light

The PRIMALED consists of 9 Led lenses split up into two separate circuits. The lamp lens has been designed to provide focused and deep light. The Ergo_Spring balancing system makes PRIMALED very easy to handle and stable. PRIMALED is suitable for any type of installation, from doctor's surgery to the intensive-care unit.

- Ergonomic design, round & ultra-flat shape of the light makes the product ergonomic & suitable for any type of installation.
- World first Ergo Spring articulating arm makes movement as light as a feather
- Cold light - low temperature generated for the doctor and patient's comfort.
- Light intensity at 0,5m distance: 86.000 lux
- Color temperature: double selection 4.500-5.000K
- d10 light field diameter @50cm: 140mm
- Shadowless and 3 dimensional lighting
- Ambient courtesy light
- Heat exchange reduces the work temperature consequently increasing the life cycle of the single LEDs – over 50,000 hours.
- Removable & Sterilisable handle

Oscilla SM910 Screening Memory Audiometer

Oscilla SM910 is a traditional screener audiometer. It is easy to use and supports an automatic 20dB test.

- Pulse tone, manual operation
- Noise free push buttons
- Very readable displays
- 11 frequencies: 125Hz – 8000Hz
- Calibration without entering cabinet
- Now with internal battery pack - SM910-B (optional)

\$2,125
+\$212.50 GST

PAXSM910

Oscilla SM930 Screening Memory Audiometer

Oscilla® SM930 is a very versatile screener audiometer. It supports 3 automatic hearing tests (20 dB, 20 dB random & Hughson Westlake) and features a built-in memory of 90 audiograms. Furthermore the audiometer can be connected to a printer through the parallel port and transfer data to software programs like AudioConsole through the serial port.

- 11 frequencies: 125 - 8000 Hz
- 10 dB to 110 dB in steps of 5 dB
- Manual or automatic test (3 automatic tests)
- Serial and Parallel ports
- Very readable displays.
- Noise free push buttons
- 4 automatic threshold tests
- Storage capacity: 90 audiograms
- Calibration without entering the cabinet
- 11 frequencies: 125Hz - 8000Hz (selectable)
- Option of visualizing the audiogram during the test

Titan Tympanometer Middle Ear Analyser

In modern healthcare settings fast and reliable testing is essential. The Titan screener is built to meet these requirements in an easy and flexible way. Titan is a compact middle ear analyser with all the functions and flexibility in a remarkably portable device. As a tool, Titan emphasises ease-of-use and speed without compromising test flexibility and reliability.

- Portable & lightweight (360 grams)
- Hi-Res colour display
- Diagnostic test battery (tymp, reflex fixed, reflex growth, reflex contra, reflex decay, ETF1)
- Screening test battery (tymp, reflex fixed, reflex growth)
- Fully customisable
- Single hand operation
- Auto-start on seal
- Storage for 250 patients
- 3.5 hours continuous test time
- NOAH3 and OtoAccess compliant
- PC integration & stand alone option
- Test cavities, carrying bag, eartip box included

Sibelsound Audio Booth

The audiometric test booths S40 is light in weight, gets a high isolation index, has great functionality and is pleasant looking. The S40 booth has a lockable door & a window with double glazing that allows patient and operator to see each other, friendly illumination and the necessary connections to plug an audiometer with all of its accessories. All the audiometers in the market can be connected; including the computer based ones. The external surface is made of washable panels and the interior is comfortable. Its design allows for quick and easy assembly by non specialised personnel.

- Great noise attenuation, 46 dB SPL at 10Khz
- Quick and easy assembly
- Compatible to any audiometers in the market
- Great functionality and pleasant design
- Quick and easy assembly by non specialised personnel
- Maximum noise attenuation of 46dB SPL.
- Unforced ventilation system (via labyrinth).
- Window with double glazing.
- Suitable for all the audiometers on the market

Optional:

1. Access ramp for wheelchairs
2. Connection pannel USB-RS232
3. Internal washable microperforated covering (DELUXE)
4. Fitted with casters for complete mobility
5. LED lighting
6. Folding table
7. Left or right hand door
8. Extra windows
9. 5 standard models plus custom-built booths

PORTABLE ULTRASOUND

Siui CTS 7700 Plus - Portable Digital Ultrasound

CTS-7700 PLUS Digital Ultrasound Scanner. A new generation of high performance B/W ultrasound system designed with a 30cm medical LCD offering powerful clinical performance. The CTS-7700 PLUS has SRT Imaging, Trapezoidal Imaging, Extended Imaging and Pulse Wave Doppler as standard and can be upgraded with Colour Flow Mapping, Panoramic Imaging and Compound Imaging. Outstanding image quality and a wide range of broadband probes make this system very easy to use, enabling a faster diagnosis with higher degree of confidence.

- Smart One Key Optimization - The system smartly adjusts TGC, B gain, base line, PRF, PW gain to acquire the best B/W image and PW image only by one-key press.
- Panoramic imaging - Extending wider view for doctors to scan large area tissue with the movement of transducer scanning.
- Wireless network transmission for working in hospitals and clinics
- Smart 3D imaging - High resolution reconstructed 3D image by moving the transducer to scan the target.
- PWD upgradeability - Supports the pulse wave doppler module for vascular and cardiology quantitative analysis.
- Spatial compound imaging - Eases echo artifacts and improved spatial resolution by scanning the target with multi-direction beamforming.
- Speckle reduction technology - Reduces noise and artifacts, purify tissue shading and edging, improve contrast resolution and identify early tissue/structure lesion.
- B mode steer for linear imaging - Adjust the angle of linear array transmission, get a wider scanning view of the linear probe.
- Trapezoidal imaging - Both in convex and linear imaging, realizes extended field of view for displaying more image information without sacrificing image quality and moving the probe.
- Built-in lithium battery (optional)

Optional:

1. DICOM3.0 port software
2. Built-in lithium battery (optional)
3. B&W Video printer

Hi Density, Broadband, Five-Frequency Probes

The system is configured with light density broadband multi-frequency probes. Probe frequency can be switched quickly by pressing one console button only, enabling doctors to select the right frequency for specific diagnosis and patients. Image resolution and penetration is significantly optimised.

PORTABLE ULTRASOUND

Siui CTS 8800 Plus – Premium Portable Digital Ultrasound

The SIUI CTS-8800 portable ultrasound unit combines the latest in ultrasound imaging technology with portability. It is extremely easy to use for all users and features a stable operating system with a 160 gig-hard drive. Capable of producing 4D black and white images at the fraction of the cost of its competitors, the SIUI CTS-8800 is the most cost-effective 4D ultrasound imaging equipment on the market today.

- High Resolution ultra wide field of view 10" LCD monitor & backlit keyboard
- Extraordinary imaging performance, in a robust system
- Ergonomic design for a convenient and comfortable experience
- Biplane Imaging with Multi-angle Biopsy
- Complete OB/GYN clinical application software
- Full digital imaging
- TGC Gain Sliders
- Speckle Reduction Technology (SRT)

Simple & Quick Real-time 3d (4D) Operation

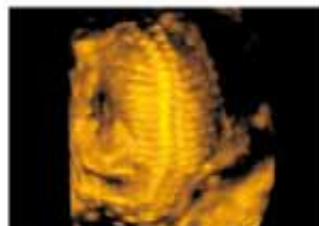

Unlike complicated operation in traditional real-time 3D (4D) ultrasound imaging, the CTS-8800 adopts simple & quick operation method. With just a few simple steps, the real time 3D (4D) ultrasound images can be easily obtained. The CTS-8800Plus offers excellent 4D imaging at reasonable price.

PORTABLE ULTRASOUND

Siui Apogee 1200 - Smart 4D Colour Doppler Ultrasound

For most hand-carried ultrasound systems image quality has been difficult to achieve. With the Apogee 1200 the situation changes as it stores and processes raw data which improves image quality. Apogee 1200 is a hand-carried Colour Doppler imaging system which is compact and easy to use. It has both the advantages of mobile colour Doppler systems and portable systems: high resolution and powerful functionality.

- Colour doppler with Hi-Res 12.1" LCD monitor
- Multiple imaging technology with clinical applications
- Advanced Graphics Processing (GPU) for fast, smooth & precise images
- Speckle Reduction Technology (SRT)
- Tissue Harmonic Imaging (THI) enhances image resolution & reduces signal interference
- Real Time Triplex - 2D images, colour images & spectrum images displayed synchronously
- Split B/Color Mode - compare 2D & colour images simultaneously
- Ultra-wide Field of View - 180° and 30cm depth (max)
- Color Steering function improves flow sensitivity
- M Zoom - Higher Intuitive analysis & accurate measurement
- 2 USB ports, 2 probe connectors
- Very powerful document management system
- Very compact, it weighs only 10 kg.
- Broadband convex probe (2.0/2.5/3.3/4.2/5.0 MHz)
- Broadband linear probe (5.0/6.6/7.5/10.0/12.0MHz)

Optional:

1. Advanced Elastography
2. 3D Imaging - rotate, zoom, trim, colour
3. Live Panoramic 4D Imaging
4. Compound Imaging

Elastography (optional)

By compressing human tissue to obtain RF signals before and after compression, tissue deformation and elasticity status can be acquired by time delay estimation, which can be used as a tool for cancer detection.

MOBILE ULTRASOUND

Siui Apogee 3500 Touch – Mobile Digital Colour Doppler Ultrasound

By integrating advanced imaging technologies such as digital beam forming, real-time continuous dynamic focusing, real-time dynamic aperture, dynamic apodisation and dynamic filtering, the user-friendly Apogee 3500 is suitable for general diagnostic procedures of the abdominal and cardiac regions, as well as peripheral vessels and small parts. 3D/4D software is optionally available. Apogee 3500 offers different solutions for your clinical applications.

- High-precision digital imaging technology
- THI, real-time compound imaging, trapezoidal imaging, extended sector imaging
- Color Doppler Flow Imaging (CDFI), spectrum Doppler
- Versatile measurement and clinical diagnostic calculation function
- Built-in workstation with 8.4 inch touch screen
- 17-inch medical LCD monitor
- Strong image and file management system
- Hard disk imaging archiving, 2 USB ports & 3 probe connectors
- Tissue Harmonic Imaging (THI) enhances image resolution

ZERZEUS200S

ZEUS-400/300/200 Electrosurgical unit

- 4 kinds of cut, bipolar and monopolar coagulation.
- Distinguish each working condition by audio sound and LED lamp.
- Best safety with Feedback system.
- Failsafe REM(Return Electrode Monitoring) monitors the size of contact area between a patient and the pad.
- Stable output power.
- Unit can stably and straghtly output power by using micro processor.
- When the unit turn off and turn it back on, last set value will display by flash memory.
- ZEUS-400 is compatibles with Argon-Z(Argon Plasma Coagulation)

CONMED 2000 Hyfrecator

Safe and simple to use, the Hyfrecator 2000 has a wide range of applications, from dermatology and gynecology to ophthalmology and urology.

- Utilises two microprocessors to provide excellent output power accuracy and patient safety
- Internal self-diagnostic tests are performed every time it is turned on
- Power is monitored continuously during operation
- Compatible with existing Hyfrecator accessories
- Ergonomic design and contemporary style

SURGICAL MICROSCOPES

Superb Optical Features

The lenses inside the microscope are made by Schott® Optical Glass imported from Germany. All lenses are multi-coated and anti-reflective, combining with infinity corrected optical system & brilliant apochromatic optics, which offer superb optical performance, including:

1. High resolution
2. Real 3-Dimensional Precise Image Reproduction
3. Large depth of field
4. Wide Field of View
5. Good Contrast

Apochromatic optics design could correct the chromatic aberration of three types of colored light effectively. It ensures the reduction and saturation of image color and improves the resolution, contrast and view depth of image.

Modular Concept Offers Most Selections

- 12.5x/18mm High Eye-point Wide-Field eyepieces with diopter locks & adjustable eyecups. Eyepiece diameter is big enough with its clear and bright lens
- The range of the Diopter of Eyepiece: +/- 6D
- 250mm objective lens
- The range of pupillary distance: 50mm to 75mm
- 3-Step Magnifications (3.2x, 8x, 20x), 5-Step Magnifications (3.2x, 5x, 8x, 12.7x, 20x) with standard 12.5x eyepiece & 250mm objective lens
- Observation field from 65mm to 100mm
- Optional magnification are available by combining eyepiece 10x, 16x or 20x & objective Lens 175mm, 200mm, 300mm, 350mm or 400mm
- Infinity corrected optical system/ coaxial illumination
- Dual LED illuminators from +/- 4' forms stereo illumination.
- Object Brightness: 45,000.00 Lx Min
- Manual focusing control with adjustable Focus Range of 11 mm
- Counterbalanced pantographic arm
- Easily maneuverable optical head with tension control knobs and 2 handles
- Microscope body can be rotated 360 degrees when casters are fixed
- The small base must be better to meet small space requirement of clinics

Optional:

1. Eyepiece 10x, 16x or 20x
2. Objective Lens 175mm, 200mm, 300mm, 350mm or 400mm
3. Beam Splitter
4. Video Camera Adapter
5. DSLR Camera Adapter
6. Angle Rotation Device
7. Support System: Floor Stand, Wall Mount Bracket or Ceiling Mount Bracket

Modular Concept Offers Most Selections

Modular Design offers you most selections for models and accessories. 3-step and 5-step Magnifications, 45° Fixed Binocular, 0-60° Inclinable Binocular, 0-180° Inclinable Binocular & Straight Binocular can be selected. You have most selections for matching your budget. Other ergonomic, function extension and documentation accessories can be upgraded at any time if you start off with standard model.

MODEL NO.	Magnification	Binocular Head	Mounting System	Suitable for
AM-P301	3 Steps	Straight	Floor	ENT
AM-P302	3 Steps	45° inclined	Floor	Dental, Surgical
AM-P303	3 Steps	0-60° inclinable	Floor	Dental, Surgical
AM-P304	3 Steps	0-180° inclinable	Floor	Dental, Surgical
AM-P501	5 Steps	Straight	Floor	ENT
AM-P502	5 Steps	45° inclined	Floor	Dental, Surgical
AM-P503	5 Steps	0-60° inclinable	Floor	Dental, Surgical
AM-P504	5 Steps	0-180° inclinable	Floor	Dental, Surgical

The AM-P8501 with straight binocular is an ideal Surgical Microscope for ENT.

MICROSCOPES / COLPOSCOPE

Alltion YSX LED Table or Wallmount Operation Microscope Lightweight with Standard Outfit

ALLTION is proud to offer YSX series of operation microscopes. Precise structure, new type of appearance and LED illumination system, offer you excellent parfocal, large field view, precise and clear three dimensional images. YSX series of operation microscopes have different working distance and magnification and suitable for the department of ophthalmology, stomatology, gynaecology, ENT and surgery. The lenses inside the microscope are made by Schott® Optical Glass imported from Germany. All lenses are multi-coated and anti-reflective, combining with infinity corrected optical system & brilliant apochromatic optics, which offer superb optical performance, including:

- Binocular straight observation unit $f' = 87\text{mm}$
- Binocular tilted observation unit $f' = 87\text{mm}$
- Focal length of objective assembly
 $f' = 200\text{mm}$, $f' = 250\text{mm}$, $f' = 300\text{mm}$, $f' = 400\text{mm}$
- Division value on hand wheel 0.6x, 1x, 1.6x
- Stand both floor and table types available
- Movable arm both long and short arms available

EXAMINATION COUCHES

Examination Couches/Tables/Stools

Geelong Medical has a large range of medical couches, tables, stools etc, suitable for Examination, Treatment, Beauty & Massage, Podiatry Rehabilitation & Speciality applications. We have many different variations to each model. Below are a few examples of our range. There are far too many list all of the options here. Please contact Geelong Medical or visit www.geelongmedical.com.au for any additional information or specifications you may require.

Stationary Examination Table

- Powder coated steel frame
- Fixed working height 78cm
- Durable PVC Upholstery
- Pneumatic lift backrest
- Backrest adjustment operated by a gas-strut allowing for quite, quick patient positioning.
- 270kg Capacity
- W 710mm x L 1840mm x H780mm
- Backrest Manually Adjusting +70°

POA
HEASVT5S28

SC Electric Examination Table

- Maximum Working Load: 250kg dynamic load (moving)
- 400kg static load (stationary)
- Working Height: 540mm - 860mm
- Table Width: 700mm, Table Length: 1930mm
- Base/Castors: X-Frame with Wheels
- Footswitch: Single Footswitch (Hi-Lo function)
- Frame: Powder Coated Rust Resistant, Steel Frame

POA

Minston - LED Xray Viewers

- Quality material. Advanced electrophoresis aluminium alloy frame. Mitsubishi screen.
- Excellent brightness and whiteless for superior viewing (13,000 Lux)
- 50% less energy required compared to most other LED Xray illuminators
- Auto flicker free illumination when film is inserted
- Only 24mm depth, makes transport easy and saves room
- Never change a bulb again. Over 50,000 hours life.
- Plugs straight into mains power. No electrician required
- Separate left right activation on double bay viewer
- Easy to adjust Brightness control

ULTRASONIC CLEANERS

Sonica Ultrasonic Cleaners

Using ultrasonic energy and a process known as cavitation, ultrasonic cleaning is the most effective way of deep cleaning difficult to reach and complex shaped items. The new range of SONICA S3 are equipped with state-of-the-art high power piezoelectric transducers and ultrasonic generators which incorporate the innovative SweepSystem oscillation technology for a truly amazing result.

Control Panel (All Models Include New Sweep System)

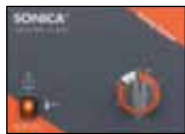

Version M - up to 15 minute manual timer

The simplest version in the SONICA range is equipped with a timer which can be set for up to 15 minutes. It can also be set to manual operation.

Version MH - up to 15 minute manual timer with 60c Heater

Is equipped with a timer which can be set for up to 15 minutes and can also be set to manual operation. The thermostat for the heater is set at 60°C. Sweep System generator included.

Version ETH - electronic timer and temperature control

Cleaning times and temperatures controlled electronically by a microprocessor. Waterproof control panel.

Version EP - Sweep System Generator

The most technologically advanced of the SONICA range: modern digital display control panel; degassing time setting; cleaning times from 0 to 99 minutes; tank liquid temperature setting up to 70°C; storage capacity for up to 10 cleaning programmes; Jet program function allows for quick and easy cleaning cycles.

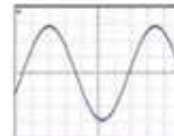

Sweep System Technology

The new SONICA S3 series with Sweep System technology offers the best performance available from ultrasonic cleaning equipment. The state-of-the-art generator incorporates a special ultrasonic oscillator using Sweep System Technology. The frequency from the ultrasonic generator operates around a central frequency of 39 KHz and the transducers shift between 38 and 40 KHz.

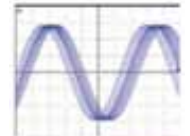

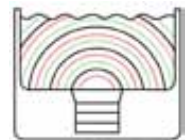

Sweep System Technology gives:

- Faster cleaning
- Increased distribution of ultrasound energy
- Damage free cleaning
- Better cleaning
- Improved cavitation

TRADITIONAL SYSTEM

SWEEP SYSTEM

Comparison of acoustic field distribution inside the liquid.

Comparison of the generators' electric output signals.

Comparison of irradiation uniformity using the two methods on a sample aluminium sheet.

STERILISERS

Cominox Sterilisers

Easy - The LCD display and user interface makes it easy to use, it will tell you exactly what's going on, what's happening next and when it requires maintenance, simple, easy & reliable

Low training required - The Cominox range, once configured and validated, only requires the push of a single button to start a cycle - there is no need to spend hours training new staff.

Intelligent - The Cominox series cleverly manages much of its own advanced technology, leaving you to load the trays, close the door and push a button.

Standards - Cominox comes with pre-loaded cycles that meet or exceed both European and Australia's stringent standard requirements.

Convenient - The Pre-programmable start function allows you to schedule your steriliser to start just before you get in each morning - there's no loads sitting overnight after being processed.

Customisable - If you have a need for a special cycle that better suits your specific requirements, it's easy for you to set your own parameters.

Support - National network of fully trained and qualified service agents.

Low Ongoing Cost of parts in scheduled maintenance are comparatively inexpensive when looking at many competitor brands. Initial build quality ensures components are not over-stressed through normal use.

 COMXACC0036

HIGH CAPACITY STERILISERS

Celitron Sterilisers

Outstanding Performances - Air removal via a powerful vacuum system, using a liquid ring vacuum pump and a condenser or large dry vacuum pump.

Large Capacity - Models from 24 - 200 Litres, as well as varied chamber dimensions according to specific demands. Process larger loads in the same amount of time as smaller sterilisers.

High Technology - Simple operation using a high-tech computerized control system. Optional powerful PC Windows based Software is available for monitoring, logging, control and service. Colour Graphic Touch Screen Display and an ergonomic User Interface. Sterilization cycles' data collected realtime on a SD card. The most advanced interface connections: Ethernet, USB, RS232 and RS485.

Support - National network of fully trained and qualified service agents.

Easy to use - Fully automatic door locking. Open and close the door by pressing only one button. RO water purification system available. A friendly graphic user interface with touch screen.

Environmentally Friendly - Energy saving mode reduces power consumption. Water saving system is available to reduce the amount of water used during cycles. Paperless recording using a SD card.

Customisable - The Pre-programmable start means that you can schedule your cycle to start just before you get in each morning - there are no loads sitting overnight after being processed.

Autoclave Chamber	Depth	Diameter
75 Litre Azteca	500mm	400mm
90 Litre Azteca	700mm	400mm
150 Litre Azteca	700mm	500mm
